

## **YWLM AMD 01/24**

### **1 Purpose**

The purpose of this amendment is to highlight changes to procedures in the current WLM FIHA AD2 SUPP.

### **2 Procedures**

This amendment provides an additional paragraph to Part A, Section 2.10 - *Special procedures for Fast Jet aircraft*. On review of the WLM TMP implementation, it was discovered that paragraph 2.11.2 – *Radar SID headings (AD2 Supp Jun 23 version)*, had been deleted in error during the transition to the AD2 Supp Nov 23 version.

### **3 Amendment details**

*Radar SID headings* – When aircraft have been issued a radar SID, a heading will not be included in the departure instructions/take-off clearance unless required for ATC traffic management purposes. Where a heading is not specified by ATC, make a single turn onto departure track IAW para 2.10.3 or 2.10.5 as applicable.

### **4 Cancellation**

This amendment will be cancelled when incorporated into WLM FIHA AD2 SUPP.
