

## **YWLM AMD 01/25**

### **1 Purpose**

The purpose of this amendment is to detail expected adjustments in ATC procedures. 453SQN WLM FLT has temporarily relocated to BLD938 (new tower) and are executing contingency procedures in order to safely provide ATS without critical enabling equipment. This move is in response to damage to the legacy tower (BLD460).

### **2 Procedures**

During the period that tower services are provided from BLD938 local operators can expect the following:

- No CIRA operations, including initial and pitch.
- Expect either a straight in Instrument or Visual Approach.
- Expect increased spacing between arrivals and holding if required.
- Expect increased spacing between departures.
- A requirement to provide 10 minutes notice prior to exiting training airspace.
- An inability for ATC to manipulate arrestor systems.

### **5. Cancellation**

This amendment will be cancelled when normal services are restored in BLD460 or this amendment is superseded.

Approved:

WGCDR Damien Fairhurst
