

YPEA AMD 01/25

1 Glide Circuits to Main Runway

1.1 Purpose

Due to the movement of the threshold of runway 18L, pilots have encountered issues conducting glide circuits to runway 18R whilst complying with the other procedures detailed in the Pearce FIHA AD2 SUPP. After consultation with the affected squadrons the following procedure change for glide circuits is to be implemented.

1.2 Procedures

Glide circuits on the runway 18 configuration may be conducted to runway 18L. Pilots conducting glide circuits are to call "crosswind glide, 18L/Full stop" when turning crosswind.

1.3 Expiry

This amendment is effective until it is cancelled or incorporated into the next addition of FIHA AD2 SUPP.
