

FIHA AD2SUPP YBOK Temporary Amendment 01-26

Re-verification of pressure altitude derived level information.

1. Purpose

ATC is required to re-verify pressure altitude derived level information (Mode C) after any period where continuous monitoring was not carried out.

2. Implementation

Add the following after para 4.2.5.6:

When returning to base after a period of operations in an LFA, pilots are to re-state their present level.

e.g “<Callsign> completed operations Lima One, maintaining two thousand five hundred, request direct Oakey, not above 3000 for circuits”.

3. Expiry

This amendment is effective until incorporated into YBOK AD2 SUPP.

Approved:

WGCDR A Armstrong
