

YWLM AMD 03/26

1 Purpose

This amendment coincides with changes to FIHA ENR 1.1 – 16.2 ADF Transponder Operation (WEF 09 Jul 26), which details separation requirements for formation flights while they transition between formation types. WLM local exclusions for In-trail and Streaming Departures are required to be removed to align with the higher document.

All effected local operators have confirmed compliance with the new procedure filed at [fBP9967929](#).

2 Amendment Instructions

Amend clause 5.5.1 within WLM AD2 SUPP dated 27 Nov 26 – Operation of transponders

Within WLM ASPC, transponders are operated IAW [FIHA ENR](#). Aircraft established in a training area may squawk standby or as directed by C2 once established within the training area.

Caution: *If the formation lead changes during flight, the new lead must squawk normal. ATC separation is based on the radar return of the formation lead.*

3 Cancellation

This amendment will self cancel when incorporated in the WLM FIHA AD2 SUPP.
